

SUNSPOT: From the Stargazer series, this piece features warm, rich brown cards with intense reddish-orange designs. The deep brown tones against a clean white background create a strong yet elegant contrast, evoking the heat and energy of a sunspot without being overly harsh.

Michał Markowski is a West London-based artist fascinated by mathematics, chaos, and chance.

His work explores the invisible patterns hidden in randomness. He takes a premium deck of playing cards, shuffles it thoroughly while recording the process to prove the authenticity of the unique outcome, and meticulously hand-assembles every card onto A1 canvas — permanently freezing one unrepeatably moment in time.

Drawing on the immense mathematics of $52!$ permutations, he creates bold, textured artworks that celebrate both chaos and order. Each piece is completely original and exists in only one version in the entire world.
