

**BOURBON 808 PROOF:** A playful deck with a rich vintage aesthetic, celebrating the world of whiskey. Detailed illustrations depicting the traditional processes of bourbon production and consumption — from distillation and barrel aging to the enjoyment of the final spirit.

Michał Markowski is a West London-based artist fascinated by mathematics, chaos, and chance.

His work explores the invisible patterns hidden in randomness. He takes a premium deck of playing cards, shuffles it thoroughly while recording the process to prove the authenticity of the unique outcome, and meticulously hand-assembles every card onto A1 canvas — permanently freezing one unrepeatable moment in time.

Drawing on the immense mathematics of  $52!$  permutations, he creates bold, textured artworks that celebrate both chaos and order. Each piece is completely original and exists in only one version in the entire world.
