ARCHITECTURAL WONDERS: This piece presents 52 + 1 iconic architectural marvels from across the world — spanning ancient civilisations, medieval masterpieces, and modern architectural icons. Each card showcases a different wonder, creating visual mix-timeline of human creativity and ingenuity.

Michal Markowski is a West London-based artist fascinated by mathematics, chaos, and chance.

His work explores the invisible patterns hidden in randomness. He takes a premium deck of playing cards, shuffles it thoroughly while recording the process to prove the authenticity of the unique outcome, and meticulously hand-assembles every card onto A1 canvas — permanently freezing one unrepeatable moment in time.

Drawing on the immense mathematics of *52!* permutations, he creates bold, textured artworks that celebrate both chaos and order. Each piece is completely original and exists in only one version in the entire world.
